

PROFESSIONALISM

The current workforce is made up of highly qualified professionals making the most important of our values.

I+D+i

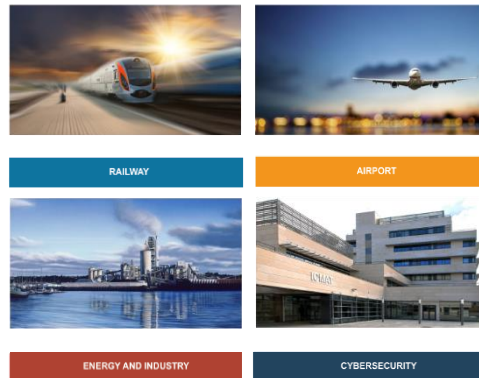

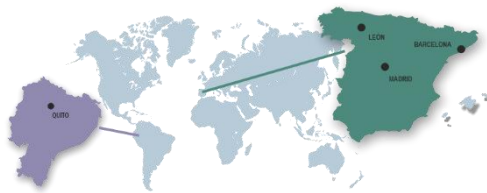

The success of this Company lies in the non-stop development, continuous investigation and innovation (I+D+i) collaborating with the most prestigious Public and Private Universities and global technology partners such as:

- SIEMENS
- SEL
- COPA-DATA

STRATEGIC DEVELOPMENT

SICA has got its own patents and collaborative ones and continues going for and investing in strategic innovative developments so as to significantly improve its products of software and systems.

SYSTEMS OF COMPUTATION AND AUTOMATIC GENERAL

- SICA (Systems of Computation and Automatic General) is a Spanish Public Limited Company founded by Manuel Casanova and Carlos Redondo after a previous professional career developing applications, computers software and hardware for the engineering field.

- SICA was established in 1995 with the aim of Developing Software and Systems in the field of analysis and management of electrical energy, and after twenty-five years, it has become a software engineering leader. Nowadays SICA develops and sets up new generation electrical management and supervision systems in the engineering fields working in infrastructures such as railways, industry 4.0 and cybersecurity.

PRODUCTS AND SERVICES

• Railways

- Measurement, Protection and Control
- Pasarelas
- Arrastres
- Tunnels
- Rings
- Needles
- PLOs
- SCADAS

• Energy

- Transport
- Distribution
- Renewable Energy

• Industry

- Automation
- Control process
- SCADAS process
- SCADAS energy

• Software Development SICA

- Total Management Energy
- IIoT
- Edge Computing
- Energy Seller Management
- BMP

• Engineering Services

- Cybersecurity
- Standardization
- Electrical Protections
- Maintenance
- Audits
- IEC 61850
- Tanks Production
